

HIGH SCHOOL

OPENING YOUR SCHOOL AFTER

COVID-19

Shut-Down

After the shut down period designed to assist with the breaking of infection has been completed there will need to be a period of adjustment to ensure we continue to break the chain of potential infection.

Here is a checklist for Schools and staff to protect themselves and their guests.

Touch points is a term used to describe a part of your building that is a common point shared by staff and students, such as door handles, light switches, washrooms, taps and the like.

How well equipped are your washrooms?

Given the known fact that hand hygiene is the single biggest thing we can all practice to help reduce spread of germs, it is astounding how many schools simply do not provide satisfactory soap and paper towels for students to dry their hands.

Make sure your staff and student bathrooms are equipped with attractive and functional paper hand towel and soap dispensers that encourage students to use them.

Start them back with the right habits.
