

# MINIBARS

## THE RIGHT MINIBAR

JVD minibars are fitted with next-gen smart technologies. Whether they are thermo-absorption, heat-absorption or smart-compressor systems, our minibars are eco-friendly and reliable.

JVD minibars are completely silent during operation, offering maximum comfort to your staying guests. They are available in different capacity to suit your cabinet fittings and come complete with LED interior lighting as well as quality lock. Purchasing a JVD silent minibar is a long-term investment in quality.

### Ventilation Requirement

When integrating the minibar into your hotel room cabinet, it is crucial that the surrounding area of the minibar must have unhindered airflow and good heat dissipation.

To achieve the best cooling performance and optimal lifespan, the minibar needs at least 200cm<sup>2</sup> free air inlet. This space should be kept constant until the air outlet at the top of the cabinet surface. The rear of the minibar should also be at least 50mm clear from the furniture wall.
