Luxury Hotel Body Care

Cinnamon & Cedarwood with Pohutukawa Extract

ABOUT CRIMSON & CO

Introducing Crimson & Co's luxury hotel body care range. This beautiful collection of shampoo, conditioner, moisturizer, and hand & body wash is made right here in New Zealand. The designer unisex fragrance is balanced with cinnamon, cedarwood and fresh Pohutukawa extract.

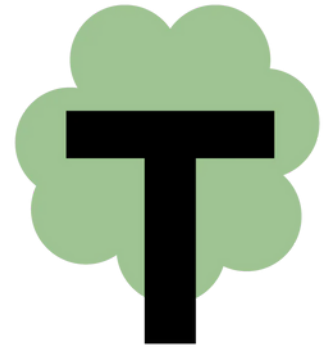

Pohutukawa is known for its ability to help condition and moisturise the skin. It's particularly helpful for dry and dehydrated skin so it will keep your guests looking young and fresh. While it is important what is in the product, it's more important what is not in the product, so this has been formulated without the nasties.

While Crimson & Co gives your guests a luxury experience, it is also the perfect fit for hotels truly wanting to make a sustainable impact.

With the dramatic global movement to remove single-use bathroom amenities and support locally made products, this brand is proud to be working with Trees That Count. With every purchase, \$3.00 per carton is donated to help Kiwis plant more native trees across Aotearoa.

These days, hotels are focused on storytelling so they can take their guests on a unique journey, giving them an unforgettable experience they will remember - Crimson & Co can do just that.

Together we can achieve great things!

TREES THAT COUNT
TE RAHI O TĀNE
